The average U.S. home has a half mile of gaps and cracks where air and moisture can enter. Installing energy-efficient windows and doors can greatly reduce this infiltration, but another area is often overlooked - around the window and door frames. Uninsulated or underinsulated framework can contribute to the home’s total energy loss and overall comfort.

Close the Gap
Seal out energy loss and help improve comfort by closing the gap between the framework and rough openings with GREAT STUFF PRO™ Window & Door Insulating Foam Sealant.

The low pressure-build formulation of GREAT STUFF PRO™ Window & Door Insulating Foam Sealant forms a durable, airtight and water-resistant seal between a window or door frame and its rough opening.

GREAT STUFF PRO™ Window & Door Insulating Foam Sealant is available in a 20 oz gun-applied version. The gun formulation can be used with the PRO™ Series Foam Dispensing Guns and is designed specifically for the PRO contractor.

With GREAT STUFF PRO™ Window & Door Insulating Foam Sealant, you can achieve better window or door installation. GREAT STUFF PRO™ Window & Door helps to prevent drafts, repels water and more, resulting in higher quality installation, improved home comfort and greater customer satisfaction.

Features and Benefits At a Glance
- Meets ASTM E2112 standards
- Low pressure-build formulation at 0.08 psi; 0.55 kPa (average) (gun foam) per AAMA 812-04
- When properly installed is proven not to bow or distort frame
- Expands to take the shape of gaps, creating a long-lasting, airtight and water-resistant seal
- Helps to maximize energy efficiency
- Bonds to vinyl, metal, wood and composite surfaces
- Repels and deflects water
- Tack-free in 3-10 minutes, Trims in 60 minutes
- Fully cured in 8 hours
- UL classified
- One 20 oz. can (gun-applied) foams 8-11 average sized residential windows
