GREAT STUFF PRO™ WALL & FLOOR ADHESIVE
STRONG BOND, WET OR DRY

GREAT STUFF PRO™ Wall & Floor Adhesive delivers serious bonding power, in almost any working condition. Because of its excellent bonding power on dry, damp and even frozen lumber, GREAT STUFF PRO™ Wall & Floor Adhesive provides a fastgrab tack and long-term high-strength bond, even in conditions that might stop traditional adhesives, leading to fast and reliable installations.

A Firm All-Around Grip
GREAT STUFF PRO™ Wall & Floor Adhesive is a premium grade heavy-duty adhesive for interior and exterior use. It is designed to bond:
• Plywood and OSB subflooring to wood joists
• Foam panels, drywall, OSB and plywood to wood framing
• Masonry, tile and concrete substrates to OSB, plywood, foam panels and drywall

A Long Reach
Stand up when applying GREAT STUFF PRO™ Wall & Floor Adhesive with the PRO 14XL Series long-barrel dispensing gun (40” [1 m] barrel). A guide tip, specially designed for PRO 14XL, helps control the position of the bead. Like the short barrel PRO 14 Series gun, PRO 14XL features:
• Durable, lightweight, high-strength aluminum body
• Nonstick can adapter and needle
• Good bead control; allows variable bead size
• No post-dispensing foam drip
• Large flow control knob with secured back-screw system

Cream in color, GREAT STUFF PRO™ Wall & Floor Adhesive is available in 26.5 oz (751 g) cans. One can of GREAT STUFF PRO™ Wall & Floor Adhesive (gun applied) equals up to 16 nominal quart tubes of traditional caulk adhesive, helping stretch the building budget even farther.*

GREAT STUFF PRO™ Wall & Floor Adhesive is available in gun applied formulation and in the United States a reusable straw applicator.

Dispensing guide tip aligns gun over framing lumber.

* Field demonstrated yield comparison. If theoretical yield is compared, one can of GREAT STUFF PRO™ Wall & Floor Adhesive (26.5 oz/751 g) (gun applied formulation) applied at 1/4” bead diameter will equal up to 16 nominal quart tubes of traditional caulk adhesive (28 oz/794 g) applied at 1/4” bead diameter.
GREAT STUFF PRO™ Wall & Floor Adhesive is compatible with Across the Board Adhesion

GREAT STUFF PRO™ Wall & Floor Adhesive is applied with a PRO Series foam dispensing gun for a simple and neat application. And the secure bond created with GREAT STUFF PRO™ Wall & Floor Adhesive helps reduces nail pops in drywall, and fl oor and stair squeaks—which will help minimize callbacks. In addition to its ability to adhere to dry, damp or frozen lumber, GREAT STUFF PRO™ Wall & Floor Adhesive features:

- All-weather formulation with freeze-thaw stability
- Excellent bonding to plywood, rigid foam insulation, drywall, concrete and more
- Tack-free in approximately 14 minutes; fully cured in 24 hours
- Ability to reduce drywall nail pops and fl oor squeaks
- High yield formulation

GREAT STUFF PRO™ Wall & Floor Adhesive is applied in a single 1/2" bead on joists and studs. For optimum performance, apply adhesive bead in a continuous zigzag, ensuring adhesive layer will completely cover joists and framing on sistered joists or studs or wherever wood panels and drywall edges meet.

- GREAT STUFF PRO™ Gun Cleaner

GREAT STUFF PRO™ Gun Cleaner is fl ammable and contains acetone and propane. Read all instructions and (Material) Safety Data Sheet (M(SDS)) carefully before use. Eliminate all sources of ignition before use. Cover all skin. Wear long sleeves, gloves, and safety glasses or goggles. Not for use in aviation, or food/beverage contact, or as structural support in marine applications. Provide adequate ventilation or wear proper respiratory protection. Contents under pressure. Not to be used for filling closed cavities or voids such as behind walls and under hub surrounds, this improper use of the product could result in the accumulation of fl ammable vapors and/or uncured material. Failure to follow the warnings and instructions provided with the product, and/or all applicable rules and regulations, can result in injury or death.

Dow Polyurethane Foam Insulation and Sealants

CAUTION: When cured, these products are combustible and will burn if exposed to open flame or sparks from high energy sources. Do not expose to temperatures above 240°F (116°C). For more information, consult (Material) Safety Data Sheet (M(SDS)), call Dow at 1866583BLUE (2583) or contact your local building inspector. In an emergency, call 1-888-983-4400 in the U.S. or 15193393711 in Canada. When air sealing buildings, ensure that combustion appliances, such as furnaces, water heaters, wood burning stoves, gas stoves and gas dryers are properly vented to the outside. See website: http://www.epa.gov/iaq/homes/hip-ventilation.html. In Canada visit http://archive.epsc.gc.ca/eng/hip/ire-ob/83-house-ventilation.html.

**GREAT STUFF PRO™** insulating foam sealant and adhesive products contain isocyanate and a flammable blowing agent. Read all instructions and (Material) Safety Data Sheet (M(SDS)) carefully before use. Eliminate all sources of ignition before use. Cover all skin. Wear long sleeves, gloves, and safety glasses or goggles. Not for use in aviation, or food/beverage contact, or as structural support in marine applications. Provide adequate ventilation or wear proper respiratory protection. Contents under pressure. Not to be used for filling closed cavities or voids such as behind walls and under hub surrounds, this improper use of the product could result in the accumulation of flammable vapors and/or uncured material. Failure to follow the warnings and instructions provided with the product, and/or all applicable rules and regulations, can result in injury or death.

**GREAT STUFF PRO™** Gun Cleaner is flammable and contains acetone and propane. Read all instructions and (M(SDS)) carefully before use. Eliminate all sources of ignition before use. Cover all skin. Wear long sleeves, gloves, and safety glasses. Provide adequate ventilation or wear proper respiratory protection. Contents under pressure. Building and/or construction practices unrelated to building materials could greatly affect moisture and the potential for mold formation. No material supplier including Dow can give assurance that mold will not develop in any specific c system.
