3. PRODUCT DESCRIPTION
GREAT STUFF PRO™ Gasket is a one component water-based flexible foam gasket enabling effective wall energy performance by creating a gasket between the drywall and framing. It dries to a durable, flexible gasket which compresses to enable a flat, uniform drywall plane. Before curing, spills and tools can be cleaned with water or a wet cloth.

Basic Use
GREAT STUFF PRO™ Gasket is designed to form a gasket-in-place foam where it is applied to the interior face of framing lumber, especially top and bottom plates, inside and outside corners and around rough openings. The gasket withstands damage during drywall installation, and once compressed behind the drywall it forms an airtight gasket. It is especially effective at blocking air leaks past the top plate into the attic and through the bottom plate and the rim joist.

- Rapid installation from an aerosol can on a Pro gun – no power tools needed
- Water-based and water clean-up before cure
- Flexible and easily compressible
- Seals over rough framing features, joist hangers, strapping, etc

Accessories
Use the specially designed GREAT STUFF PRO™ Gasket Dispensing Gun, identifiable by its blue handle, which matches the blue collar on the cans. This gun is compatible with the water-based product, and comes with a hose adapter for easily flushing water through the gun. This gun is NOT compatible with polyurethane foams. Do NOT use solvent based gun cleaners. Do not dump rinse water into sewer, on ground or in a body of water.

4. TECHNICAL DATA
Applicable Standards
GREAT STUFF PRO™ Gasket has been tested to the following:
- ASTM E283 – Standard Test Method for Determining Rate of Air Leakage Through Exterior Windows, Curtain Walls and Doors Under Specified Pressure Differences Across the Specimen. (Modification to measure the gasket effectiveness between 2x4 lumber and drywall.)
Contact your Dow sales representative or local authorities for state code requirements.

5. INSTALLATION
GREAT STUFF PRO™ Gasket should be applied when outdoor temperatures are between 32° - 100°F (0° - 38°C). Optimum can temperature is 60° - 90°F (15° - 32°C) and relative humidity <60%. At relative humidity > 70%, GREAT STUFF PRO™ Gasket beads will dry with some shrinkage. The gasket function is retained. Users may increase bead size from ½” to ¾” to compensate for this greater drying shrinkage. Surface where applied should be free of grease, oil, frost and liquid water. Damp surfaces will not impair the bond.

Apply a continuous ½” bead on the interior face of lumber which forms top plates, bottom plates, corners formed at wall intersections, and around rough openings for windows and doors. After beads have dried (6 hours, up to 24 hours in highest humidity), install drywall in the usual fashion.

Contact your Dow representative for details of this test modification.
This numerical flame spread rating is not intended to reflect hazards presented by this or any other material under actual fire conditions.
Tested as applied in three – 3/4 inch (19 mm) diameter beads 5 inches (127 mm) on center covering 12.5% of the exposed test sample area.
Safety and Conditions of Use

- Read the label and (Material) Safety Data Sheet ((M)SDS) carefully before use.
- GREAT STUFF PRO™ Gasket is incompatible with one component, moisture curing polyurethane foam, including the various GREAT STUFF® Insulating Foam Sealants. Dispense GREAT STUFF PRO™ Gasket only through the GREAT STUFF PRO™ Dispensing Gun, and never dispense moisture curing polyurethane foam through the GREAT STUFF PRO™ Gasket Dispensing Gun.
- GREAT STUFF PRO™ Gasket contains flammable blowing agents. Vapor may travel to other rooms. Ensure adequate ventilation. Shut off all pilot lights and extinguish open flames; eliminate all sources of ignition before use. Do not smoke or use lighters or matches while dispensing foam.
- Do not breathe vapor or mist. Use in well-ventilated areas or wear proper respiratory protection.
- The contents are under pressure. The can may burst if left in areas susceptible to high temperatures, such as motor vehicles, or near radiators, stoves or other sources of heat. Do not place can in water. Do not puncture, incinerate or store at temperatures above 120°F (49°C).
- GREAT STUFF PRO™ Gasket should not be used around heaters, furnaces, fireplaces, recessed lighting fixtures or other applications where the foam may come in contact with heat-conducting surfaces. For proper ventilation of combustion appliances, visit www.epa.gov/iaq/homes/hipventilation.html.
- Do not inject GREAT STUFF PRO™ Gasket into large or confined cavities such as behind holes in drywall or under tub wall surrounds where flammable vapors may collect. Foam must be exposed to air to thoroughly cure by drying.
- GREAT STUFF PRO™ Gasket is not a fireblock material.

NOTICE: No freedom from any patent owned by Dow or others is to be inferred. Because use conditions and applicable laws may differ from one location to another and may change with time, Customer is responsible for determining whether products and the information in this document are appropriate for Customer’s use and for ensuring that Customer’s workplace and disposal practices are in compliance with applicable laws and other government enactments. The product shown in this literature may not be available for sale and/or available in all geographies where Dow is represented. The claims made may not have been approved for use in all countries or regions. Dow assumes no obligation or liability for the information in this document. References to “Dow” or the “Company” mean the Dow legal entity selling the products to Customer unless otherwise expressly noted. NO EXPRESS WARRANTIES ARE GIVEN EXCEPT FOR ANY APPLICABLE WRITTEN WARRANTIES SPECIFICALLY PROVIDED BY DOW. ALL IMPLIED WARRANTIES INCLUDING THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY EXCLUDED. The buyer assumes all risks as to the use of the material. Buyer’s exclusive remedy or any claim (including without limitations, negligence, strict liability, or tort) shall be limited to the refund of the purchase price of the material. Failure to strictly adhere to any recommended procedures shall release The Dow Chemical Company, and its subsidiaries, of all liability with respect to the materials or the use thereof. The information herein is not intended for use by non-professional designers, applicators or other persons who do not purchase or utilize this product in the normal course of their business.

CAUTION: GREAT STUFF PRO™ Gasket sealant products contain a flammable blowing agent. Read all instructions and (Material) Safety Data Sheet ((M)SDS) carefully before use. Eliminate all sources of ignition before use. Wear long sleeves, gloves, and safety glasses or goggles. Not for use in aviation, or food/beverage contact, or as structural support in marine applications. Provide adequate ventilation or wear proper respiratory protection. Contents under pressure. Not to be used for filling closed cavities or voids such as behind walls and under tub surrounds; this improper use of the product could result in the accumulation of flammable vapors and/or uncured material. Failure to follow the warnings and instructions provided with the product, and/or all applicable rules and regulations, can result in injury or death.

CAUTION: When cured, these products are combustible and will burn if exposed to open flame or sparks from high-energy sources. For more information, consult (Material) Safety Data Sheet ((M)SDS), call Dow at 1-866-583-BLUE (2583) or contact your local building inspector. In an emergency, call 1-888-636-4400 in the U.S.

When air sealing buildings, ensure that combustion appliances, such as furnaces, water heaters, wood burning stoves, gas stoves and gas dryers are properly vented to the outside. See website: http://www.epa.gov/iaq/homes/hipventilation.html.
